

**ABSTRACT**

A medicament dispenser device for use in the delivery of a combination medicament product is disclosed. The device includes a first medicament container for containing a first medicament component; a first release means for releasing the contents of the first medicament container; at least one further medicament container for containing at least one further medicament component; and at least one further release means for releasing the contents of each said at least one further medicament container. The first medicament component is kept separate from the at least one further medicament component until the point of release thereof for delivery in combination. The dispenser device can additionally include at least one actuation indicator associated with the first medicament container and the at least one further medicament container.
